

# Wastewater treatment

## Project Data

**Country**

Kärstna, Estonia

**Application**

Wastewater treatment

**Category**

Municipality/Residential area

**Selected Product**

oneAdvanced 44PE

**Max. daily flow rate [l/d]**

6600

In 2024, Kärstna nursing home in Estonia installed a Graf SBR wastewater system (oneAdvanced 44 PE), replacing an outdated septic tank. This state-of-the-art solution ensures efficient, sustainable treatment, improving residents' quality of life while reflecting the facility's dedication to environmental responsibility and modern, reliable wastewater management for a healthier future.
